

# GET MORE DONE WITH IRRITROL® VALVES.

Valves are valves, right? Wrong. For us, valves have been an ongoing 40-year obsession that created such innovations as the PVC valve, glass-filled nylon valve and jar-top valve that are industry standards today. More importantly, our fixation on valves created the toughest, most durable family of valves in the industry. Today, the works-right-

out-of-the-box dependability you expect from Irritrol remains at the heart of every valve we make. "For Pete's Sake, Let's Only Do This Once." This is more than a great headline—it's a statement on how you approach every job and your expectations from the family of valves you rely on every day.

Our valves are tough and dependable. Install them and rest easy.

## MANY VALVES. ONE GOAL.

No two jobs are the same. That's why

Irritrol® offers a family of valves that

includes the one you'll need for the

residential job you're doing tomorrow,

and the many you'll need for the

commercial job that will take up most of

next week. Whatever the job, our valves

our tough, dependable and easy to

install. Put another way, our valves are

your best connection to productivity.

### OVER 40 YEARS OF RELIABILITY

#### 2400/2600 Electrical Globe/Angle

Featuring the original jar-top design, these residential globe and angle valves offer solid construction, reliable performance and convenient operation in a large number of configurations.

- Rugged, Double-Beaded Santoprene® Diaphragm
- Internal and External Bleed (Flush Mode)
- Available in multiple configurations—Female NPT, Slip, Male x Male and Male x Barb (available with NPT threads only)

#### 205 Electrical Globe

These full-featured, rugged, debris-tolerant valves feature flow ranges from .25 to 30 GPM, making them ideal for everything from drip to high-flow residential and light commercial application.

- High-Flow, Low-Friction-Loss Design, Combined with Low-Flow Capability
- Heavy-Duty, Corrosion and UV-Resistant PVC Construction
- Available in Female NPT or Slip Configuration (No Male Pipe Adapter Required)

#### 2500 Electrical Globe

These valves boast everything that the 205 valves offer today with the added feature of a stainless steel, self-cleaning metering system for enhanced debris tolerance.

- Internal and External Bleed (Flush Mode)
- Rugged, Double-Beaded Santoprene® Diaphragm
- Self-Aligning Bonnet

### TOUGHEST UNDER PRESSURE

#### 100 Electrical Globe/Angle

Heavy-duty construction and a host of enhanced features make these globe/angle valves ideal for the most demanding commercial applications.

- 200 PSI (14 Bar) Pressure Rating
- Tough Glass-Reinforced Nylon, Stainless Steel and Brass Construction
- Externally Removable, Self-Cleaning Metering System

#### 700 Ultraflow Electrical Globe

An extremely low-friction design makes this valve ideal for low-pressure and multiple-head applications.

- Unique Straight-Through Flow Path
- Tough Glass-Reinforced Nylon, Stainless Steel and Brass Construction
- High- and Low-Flow Operation

#### 200B Electrical Globe/Angle

Durable heavy-duty construction ensures reliable performance in these cost-effective, commercial/light commercial valves.

- Heavy-Duty, Corrosion and UV-Resistant PVC Construction with Stainless Steel Spring and Hardware
- Slow-Closing Design
- Accepts OmniReg™ Modular Pressure Regulator

### DEPENDABILITY MEETS FLEXIBILITY

#### 2700 Electrical and Manual Anti-Siphons

These popular anti-siphon valves have built-in atmospheric vacuum breakers for outstanding performance and reliability in residential applications.

- Rugged, Double-Beaded Santoprene® Diaphragm
- Full Stainless Steel Metering System (DPR models)
- Patented Floating Metering System (APR models)

#### 311A Electrical Anti-Siphon

These premier anti-siphon valves feature outstanding durability for consistent, dependable performance in all types of applications.

- Upper Body and Air Vent Cap Constructed of Glass-Filled Nylon
- Rugged, Double-Beaded Nylon-Reinforced Buna-N Diaphragm
- Internal and External Bleed (Flush Mode)
