

Rain Dial®/Rain Dial® Plus Series

Irritrol Systems...

The choice of the professional irrigation contractor

Trust the products that irrigation contractors have counted on for years! Professional-grade Irritrol Systems components are designed and manufactured with a focus on heavy-duty construction, dependable operation and homeowner convenience.

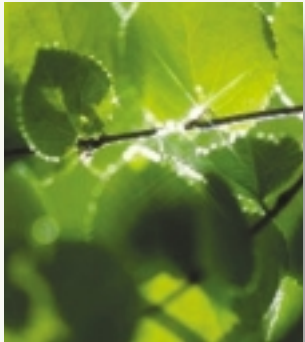

A brand of The Toro Company specifically for professional irrigation installers, Irritrol Systems is a name you can trust to help provide the beautiful, trouble-free lawn and garden your home deserves.

Rain Dial controllers provide dependable operation to ensure your automatic irrigation system is continually "on the job." With options to meet a variety of needs, these timers offer scheduling flexibility and user-friendly programming.

Your landscape is under control with Rain Dial!

During installation, your irrigation controller will be programmed to tell your system what days, what time and how long to water each area of your landscape, based on the needs of your existing lawn, trees and shrubs. Your contractor also will show you how to make adjustments for seasonal changes, changes in plant material, or any other needs that may arise.

Irritrol Systems' Rain Dial controllers are designed to provide dependable, consistent operation automatically. No more forgetting to turn the sprinklers off or on, or returning from vacation to a brown lawn and dead flowers...Rain Dial has it handled!

Designed for a variety of residential landscapes, Rain Dial offers:

- Seven-day calendar or a "Skip Days" interval option for scheduling flexibility
- Easy-to-read dial and large, self-prompting LCD for trouble-free programming
- Battery backup that keeps accurate time and maintains programmed information in case of power failure
- Durable construction and electrical surge protection for long-term reliability
- Fully automatic operation with semi-automatic and manual options

Rain Dial Plus also provides:

- 365-day calendar for scheduling options such as Odd/Even date watering
- One-button "water budgeting" for fast and easy seasonal adjustments
- Non-volatile memory to hold programming information indefinitely
- Rain sensor compatibility for even greater water savings
- Remote control option for added convenience
