

Total Control® Series

Irritrol Systems...

The choice of the professional irrigation contractor

Trust the products that irrigation contractors have counted on for years! Professional-grade Irritrol Systems components are designed and manufactured with a focus on heavy-duty construction, dependable operation and homeowner convenience.

A brand of The Toro Company specifically for professional irrigation installers, Irritrol Systems is a name you can trust to help provide the beautiful, trouble-free lawn and garden your home deserves.

This full-featured, highly versatile controller has what it takes to handle the watering requirements of the most sophisticated landscape. Plus, it offers its state-of-the-art technology in an easy-to-use package!

Total Control...The name says it all!

A quality controller, properly programmed by your contractor, is key to a beautiful landscape. After all, it's the controller that tells your system when and how long to water your lawn, trees, flowers and shrubs. Your contractor also will show you how to make simple programming adjustments for seasonal changes, changes in plant material, or any other needs that may arise.

With Irritrol Systems' Total Control on the job, dependable irrigation of all your landscape areas is ensured. The Total Control never forgets to turn on the system, and it never over waters. Best of all, you don't have to pay it when you go on vacation!

Perfect for sophisticated landscapes, Total Control offers:

- Highly flexible scheduling options to meet a variety of watering requirements, including local watering restrictions
- Availability of up to 24 stations for compatibility with any size landscape
- User-friendly dial and large LCD for trouble-free programming and status verification
- Non-volatile memory to maintain programming information in case of power failure
- One-button "water budgeting" for fast and easy seasonal adjustments
- Simple, programmable "off" during rainy weather
- Heavy-duty construction and electrical surge protection for long-term reliability
- Rain sensor compatibility for even greater water conservation
